MAKING ANY FRACTION INTO A DECIMAL:
Divide the numerator (top number) by the denominator (bottom number). Ex., $63/64 = 63 \div 64 = .984375$.

Estimating Silver Prices

•GOING FROM SIZE TO WEIGHT
Precious metals items have a weight-per-foot or -inch figure in their listing. This number, multiplied by the size of desired piece, gives an approximate weight.

Silver is ultimately billed by the troy ounce, even if you order by dimensional size.

Price breaks are awarded on a total-weight-purchased basis. You can economize by collectively buying with friends. Remember that fine/sterling silver and solders combine for quantity pricing.

Sterling/fine silver materials and solders are sold by the troy ounce.

The price per ounce is determined by adding the right fabrication charge to the daily H&H base silver price. Your fabrication charge is determined by the type of items you order, and the total actual weight of those items.

EXCEPTIONS: PASTE SOLDERS AND PMC.

Wire Coiling Charges

Applied to wire orders when two or more coils, under 5 ounces each, of a single gauge are requested. The charge is \$.50 per coil.

1) One 4-ounce coil of 22 ga. round wire and one 2-ounce coil of 20 ga. half-round wire will not incur a coiling charge.

2) Five 3-ounce coils of 22 ga. round sterling silver wire:

5 coils x \$.50 = \$2.50 coiling charge.

Item number on your invoice will be "COILCHARGE".

Sheet Cutting Charges

We can cut multiple pieces of a sheet, at no cost, where the cut is at least 1/2" long, at full sheet width. Charges will be levied on cutting under 1/2" at full width, and on any further shearing of cut-to-length pieces. Each cut is 5¢, billed as item number "CUT SHEET".
